Publicaciones:

Wind speed variability study based on the Hurst coefficient and fractal dimensional analysis. Energy Science and Engineering, 2019.

Techno-economic feasibility study of small wind turbines in the Valley of Mexico metropolitan area. Energies, 2019.

Wind turbulence intensity at la Ventosa, Mexico: A comparative study with the IEC61400 standards. Energies, 2018.

Harmonic modelling of the wind turbine induction generator for dynamic analysis of power quality. Energies, 2018.

Wind speed forecasting using the NARX model, case: La Mata, Oaxaca, México. Neural Computing and Applications, 2016.

Experimental study of temperature erosion tests on bidirectional coated and uncoated composites materials. Materials research express, 2020.

Participación en Congresos:

Modal Analysis on a Wind Turbine Blade Based on a Wind Tunnel Experiments. International Modal Analysis Conference-XXXVIII, 2020.

Aplicación del Conocimiento:

Patente: Máquina de movimiento reciprocante para pruebas de desgaste. No: en trámite, 2020.
